CLINICAL TRAINING

The Elisabeth DeLuca School of Nursing proudly partners with a vast and expanding network of clinical training sites across the state and beyond, offering students access to hands-on experiences in diverse health care settings. With strong ties to a wide array of health care agencies located within a 75-mile radius from campus, the school ensures that every student is immersed in real-world learning from day one.

The UConn simulation education program is at the forefront of simulation technology and education practices. The school maintains a high-tech Clinical Simulation Learning Center, where over a dozen simulation manikins mimic physiological functions and represent diverse populations, ethnic backgrounds, and life stages.

RESEARCH

Fiscal Year 2026 Research Funding:
